

Trades Unlimited

Roofing • Kitchens • Baths • Windows

We are very grateful...

Because of you, our valued customers, business has been very good this year. We are so thankful to have the opportunity to serve you and hope to continue to earn your business and referrals in the future.

Thank you very much!

HOME REPAIR (()) ON THE AIR
The HouseTalk Show

HouseTalk Every Saturday – 8:00 to 10:00 AM!

Did you want to successfully grow your own **organic vegetables** without spending a lot of money? If you tuned in to hear *The Garden Masters*, **Ted Hallett and John Chapman**, you heard them tell us how. Their goal — teach as many families as possible to feed themselves in a healthful and affordable way. Go to www.thegardenmaster.com for more details and sign up for their newsletter.

We have had many other guests on such as, **Kevin Howard** from Howard Air. Howard Air is a **Trane Comfort Specialist**. Kevin shared many tips and answered several questions concerning Air Conditioning.

Get a preview of each show's guests and topics by going to housetalkshow.com and sign up for our newsletter. You will receive a weekly email announcing guests and their topics for discussion on the upcoming Saturday morning show.

Other things that are available at housetalkshow.com are:

1. Archived shows.
2. Referrals to contractors we recommend.
3. Valuable guides on how to hire a contractor.
4. Videos and much more...

Arizona's deep — dark — construction industry "secret" ...water intrusion!

In the last several years we have been called out literally thousands of times to look at leaks that people have suffered with for several years. In one case, a couple had built their home 26 years prior to us getting involved and for all of those years, after throwing thousands of dollars at the problem, still had multiple leaks in their home!

Imagine being in this situation: You have just bought a used home or had a new home built. You go through a few rains and everything is good, you are really enjoying your home. Then a real wet period comes along with the rain sticking around for a while and really saturating things. Then you discover that you have some leaks! Of course you immediately call a roofer and they come out, diagnose the situation and correct it for you. More time goes by, a few more rains, maybe even a couple of years pass by with no troubles and then we get rains that stick around for a while again and saturate things — your leaks are back! If this pattern continues, the following things may happen:

- 1) You will probably buy a brand new roof only to find that it did not stop any of the leaks — in some cases you will find even more leaks!
- 2) You go through the cycle with the roofing company that put the brand new roof on — have them fix it again — then it rains — the leaks are back, etc...
- 3) You become hyper aware of the forecast...
- 4) You start to hate the rain even though you know we need it...
- 5) You begin to really dislike your home...
- 6) You lose all trust and confidence in roofing companies...
- 7) Some of you may even hope your house will burn down (without you in it), because you cannot even sell it in the condition it is in.

The above items are not made up or imagined. Every last thing mentioned above we have seen our customers (some of you) experience. Why do these things happen? Because there is an unbelievable amount of ignorance in the building industry regarding how our buildings keep water out! *It is not just the roof that does that!* You can have leaks that originate from walls, windows, doors, improper roof to wall connections, etc. Watch the videos at www.TradesUnlimited.com for more info or give us a call at 480-483-1775.

Above and below are examples of water infiltration damage.
